BITREK CONNECT – is the unique GPS-tracking system which allows to connect unlimited quantity of additional sensors and equipment via CAN interface.

BITREK CONNECT determines the coordinates, speed, distance, and obtains data from any additional equipment and sensors and sends all the information to server via GPRS or 3G (optional).

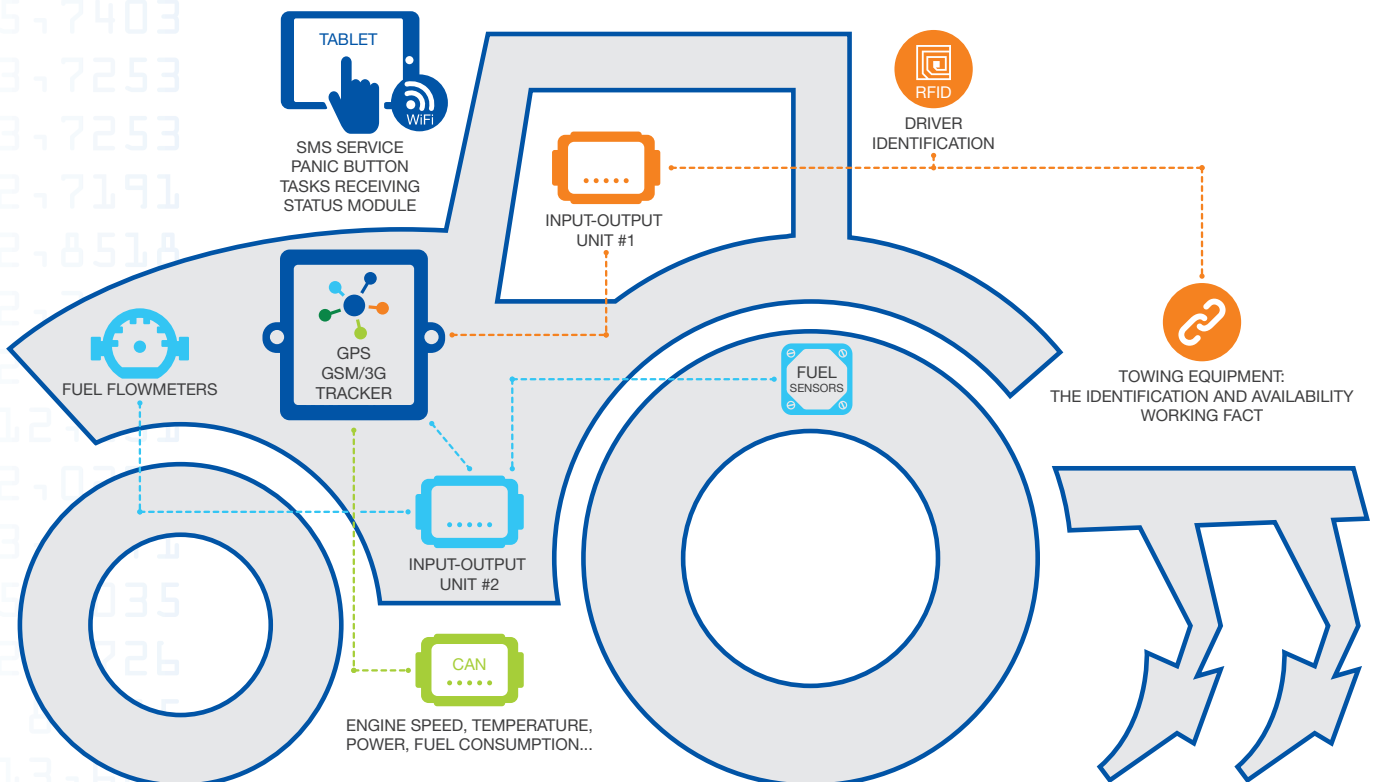

- ✔ The device provides high-quality tracking, ignition control, fuel level sensors and other peripherals.
- ✔ Supports direct connection to CAN bus of the vehicle via FMS-protocol.
- ✔ Built-in battery allows to operate up to 12 hours without the external power.
- ✔ Device stores up to 65000 records (several weeks) in offline mode without the GSM coverage and automatically uploads them to server when GSM appears.
- ✔ Compact size and protected power circuit allows device to be used in hazardous and harsh environment.
- ✔ The case is made of fiberglass-reinforced and provides IP65 protection.
- ✔ The device is equipped with a hermetic connector for industrial usage with the highest protection IP68.
- ✔ Able to connect additional equipment (sensors) through the protected circuit.
- ✔ Supports FOTA (firmware-over-the-air) - remote firmware upload and setting adjustments.
- ✔ Device has open protocol and is compatible with many popular software.

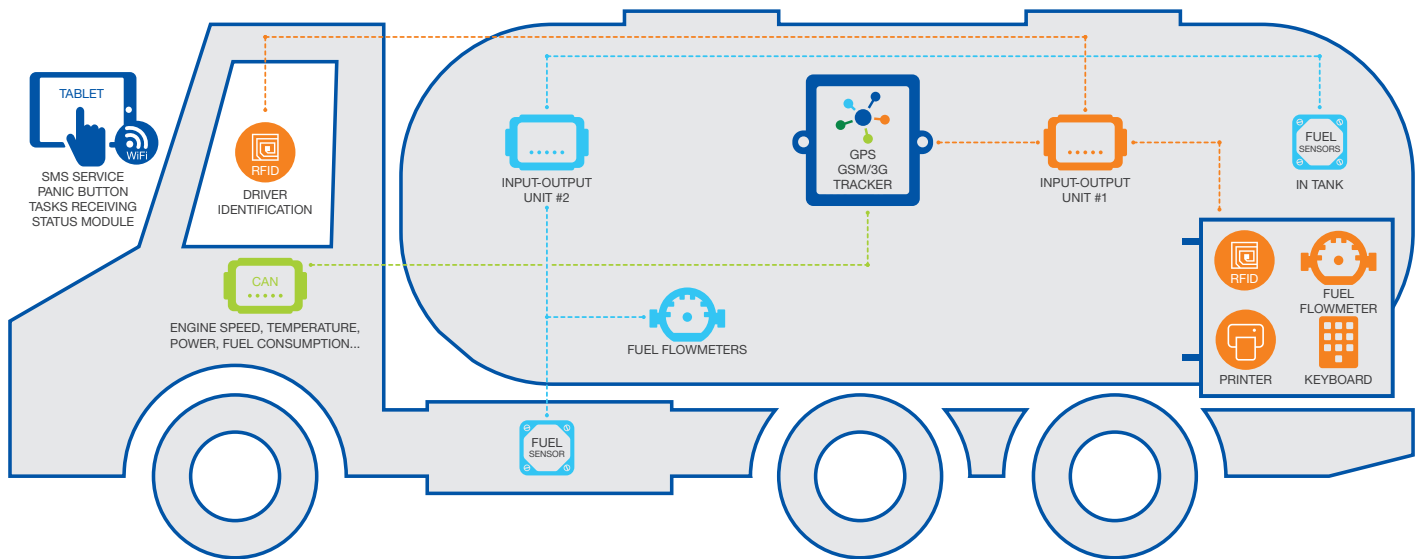

BITREK CONNECT FOR COMBINE

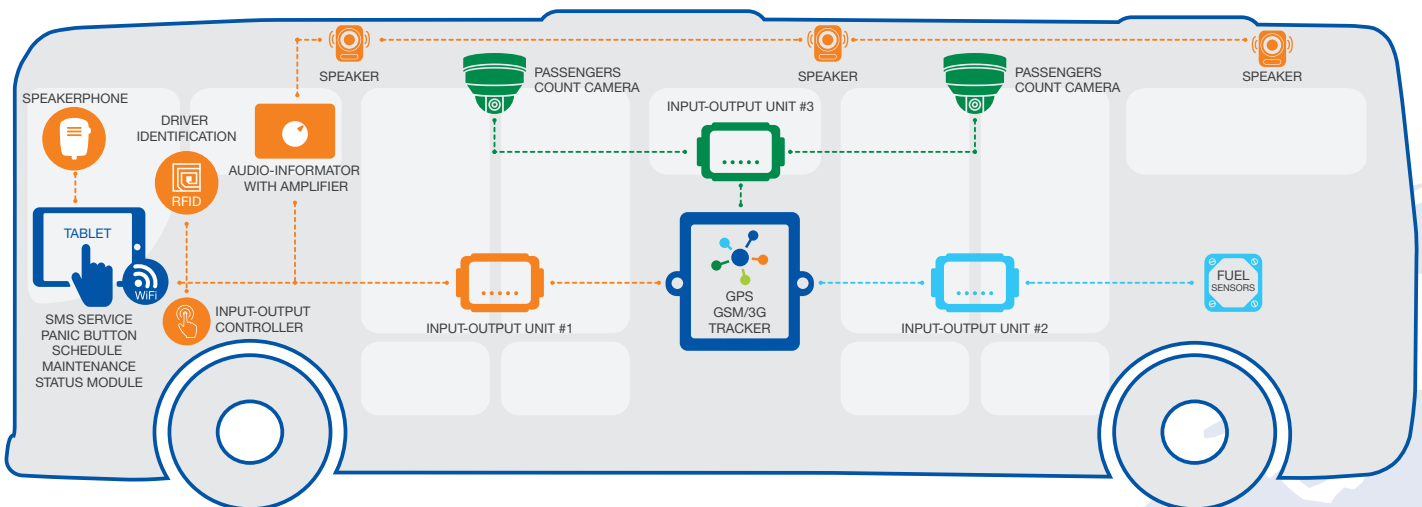

BITREK CONNECT FOR TRACTOR
